## **Education Analytics Named a 2026 Ed-Fi Alliance Premier Partner for Advancing Effective K–12 Data Practices**

[**MADISON**, Wis. Dec. 16, 2025] — Education Analytics (EA) has been named a 2026 Ed-Fi Alliance Premier Partner, recognizing EA’s leadership in helping education systems use data more effectively to improve outcomes for students. EA was also recognized as a [2025 Premier Partner](#).

“We’ve used the Ed-Fi Data Standard to build statewide infrastructure with South Carolina, are preparing to onboard more than 800 districts in Texas through the Texas Education Exchange, and will work with half of California’s districts in the coming year to help create more connected systems and deliver timely, usable data to the people who support students every day,” said Marlena Holden, director of Brand & Communications at Education Analytics.

The designation highlights EA’s commitment to aligning with the Ed-Fi Data Standard to reduce complexity, support scalable data systems, and ensure timely, usable information reaches the educators and leaders working every day to support students.

The Ed-Fi Alliance selected its 2026 Premier Partners for their leadership in developing and scaling solutions that strengthen data quality, enhance security, and ensure consistent, reliable information across K-12 systems nationwide.

“Premier Partners show what’s possible when product teams design with educators in mind and the Ed-Fi Data Standard at the foundation,” said Sean Casey, head of partnerships at the Ed-Fi Alliance. “They’re making it easier for schools and systems to use data in practical, meaningful ways, improving how decisions get made every day, and positioning themselves for product market fit, meaningful returns on their investment, and customer success.”

The 2026 Ed-Fi Alliance Premier Partners are ACT, Education Analytics, EdGraph, iReady, Infinite Campus, PowerSchool, and Skyward.

## **About Education Analytics**

Founded in 2013 as a nonprofit, Education Analytics has supported more than 2,000 local education agencies across 33 states by delivering in-depth research and advanced analytics designed to drive meaningful improvements in education. EA's work spans large urban districts, smaller regional education collaboratives, state education agencies, leading universities, research organizations, charter management groups, and other nonprofit partners committed to enhancing educational outcomes.

## **About the Ed-Fi Alliance**

The Ed-Fi Alliance works with technology providers, districts, and states to make data timelier and more useful for educators. Using the Ed-Fi Data Standard, the Alliance helps bring information from different systems into one clear picture – powering informed decisions that help educators respond quickly and improve outcomes across classrooms.
